PROFESSIONAL SUMMARY

Results-driven Computer Science graduate bridging the gap between Business Intelligence, Data Analytics, and IT Service Management (ITSM). Experienced in leveraging Power BI, SQL, and Data Governance principles to deliver decision-support insights, while optimizing IT service operations and streamlining enterprise workflows to drive efficiency across government and enterprise sectors.

EDUCATION

Bachelor of Computer Science (First Class Honor) | Umm Al-Qura University June 2020 – June 2024

GPA: 3.86 / 4.00

EXPERIENCE

Service Delivery Officer (Tamheer) | Perfect Presentation (2P) Feb 2026 – Present

- Operational ITSM Analytics:** Evaluated operational ITSM metrics across Incidents, Service Requests, and Change Requests, building executive Power BI dashboards to monitor KPIs and uphold 98%+ SLA compliance.
- CMDB & Enterprise Asset Management:** Led the discovery, auditing, and reconciliation of 1,000+ IT assets, constructing a structured Configuration Management Database (CMDB) across enterprise client projects.
- Asset Tracking & Process Optimization:** Digitalized asset tracking procedures, improving data accuracy by 35%, eliminating manual record discrepancies, and reducing device lifecycle processing time by 20%.
- Hardware Replacement Project Coordination:** Coordinated dynamic hardware exchange initiatives for over 300 users, overseeing allocation and documentation for seamless deployment and compliance.
- Executive Reporting & BI:** Prepared weekly and monthly service delivery reports for senior leadership, delivering predictive insights that optimized team workflows and reduced average resolution time by 15%.

Data Analyst (Project Contract) | Madinah Development Authority Jan 2025 – Jan 2026

- Risk Assessment & Strategic Analytics:** Executed data analysis and risk assessment on complex datasets for a confidential government project, supporting executive decision-support reporting.
- Stakeholder Requirements Gathering:** Collaborated with cross-functional teams to define project objectives and system requirements, aligning technical capabilities with core business needs.
- Interactive Visualizations & Insights:** Engineered interactive Power BI dashboards and predictive analytics models to translate complex technical findings into actionable strategies for non-technical leadership.

TECHNICAL PROJECTS

Enterprise Managed IT Services Projects | Perfect Presentation (2P)

Taibah University Managed IT Services Project

- CMDB & Asset Mapping:** Spearheading end-to-end IT asset discovery and CMDB configuration for university-wide IT infrastructure, establishing automated Configuration Item (CI) relationships.
- Workflow Optimization:** Streamlined Incident, Change, and Request Management workflows, reducing operational friction across university IT operations.

Madinah Region Municipality Managed IT Services Project

- Asset Inventory & Data Reconciliation:** Managed hardware exchange and registration for municipal operations, enhancing allocation log accuracy by 25%.
- ITSM Service Desk Analytics:** Analyzed service desk operational data to generate key performance metrics and sustain high SLA compliance standards.

SKILLS

ITSM & Asset Management: CMDB Configuration, IT Asset Management (ITAM), Service Delivery, Incident & Change Management, ITIL 4 Framework, SLA Monitoring, Process Optimization.

Data Analytics & BI: Business Intelligence (BI), Power BI, DAX, Power Query, Data Modeling, Predictive Analytics, Data Governance, SQL, Advanced Excel.

Systems & Technical Proficiency: Requirements Gathering, SDLC, Systems Thinking, HTML/CSS, JavaScript, PHP, Python (Data Analysis).

Professional Skills: Stakeholder Communication, Cross-Functional Collaboration, Problem-Solving, Executive Reporting.

CERTIFICATIONS & COURSES

- ITIL® 4 Foundation (IT Service Management) - (In Progress)
- SQL for Business Analysis - Udemy
- Data Analysis using Power BI - Tuwaiq Academy
- Angular Development - Tuwaiq Academy
